Training of Occupational Health & Safety

VOCATIONAL TRAINING PROGRAMS FOR CONSTRUCTION INDUSTRY

WE PROVIDE
CIVIL, MECHANICAL AND ELECTRICAL TRAINING
IN A CAMP LIKE ENVIRONMENT

Who we are

Brentford Institute of Technical Training provides vocational training to candidates for the Construction Industry. BITT has teamed up with TAFE of Australia (Technical and Further Education) to deliver the right training, by the right trainers, in the right environment. Focused education is the only way to bridge the gap between available skills and required skills.

BITT staff primarily consists of Trainers who have vast overseas experience in countries such as Dubai and Saudi Arabia. BITT provides accommodation, food and medical to all candidates in its camp where strict discipline is maintained. Our ratio of 1 instructor to 12 candidates ensures individual education. Our 24 hour monitoring assesses attitude and aptitude of each worker. Our success lies behind our ability to deliver candidates with the right skill, right productivity and right attitude.

BITT's sister company, Dynamic Staffing Services has placed over 175000 people to over 25 countries. DSS has sent candidates for projects such as Palm Jumeriah, Atlantis Hotel, One and Only Reeti Rah, King Faad Medical City and multiple additional projects in the Oil and Gas, Mechanical and Electrical verticals. DSS understands the skills required to deliver world class projects. This learning has given BITT an opportunity to create custom curriculums based on client requirements in order to train candidates to levels never seen before.

Skill Upgradation

The quality expectation of a finished product today is higher than before. To deliver up to these expectations, candidates are required to have adequate skills, without which the delivered product will never be up to the required standards. The gap between skills present in candidates and the skills required is vast and even though candidates are willing to learn, no mechanism / program have been able to bridge this gap.

BITT has the ability to train candidates and empower them with skill which is acceptable by International standards with proper safety induction and assessment of productivity.

Training of Occupational Health & Safety

Course Strength: 50-60

Min. Pre-Qualification: Should be either Charge Hand, Foreman or Safety Supervisor with 3-5 years experience in construction safety

Min. Education: 10th Class

Duration: 1 week

Working days: 6

Theory Classes: 30%
